***Allowable Subject Matter***

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not show nor fairly suggest the invention of the independent claims 1 and 10 which each include an electrode arrangement for a composite transducer array comprising a piezoelectric polymer composite panel with electrodes on each surface, one of these electrodes is continuous and on one surface while the other electrode includes electrode segments which are angular segments of a circular ring and are concentrically arranged, while being electrically isolated from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is intended to show the state of the art.
